Nº 02 • SCOREBOARD

Per-engine performance ranked by net P&L. Star marks the day's leader; rows tinted by outcome.

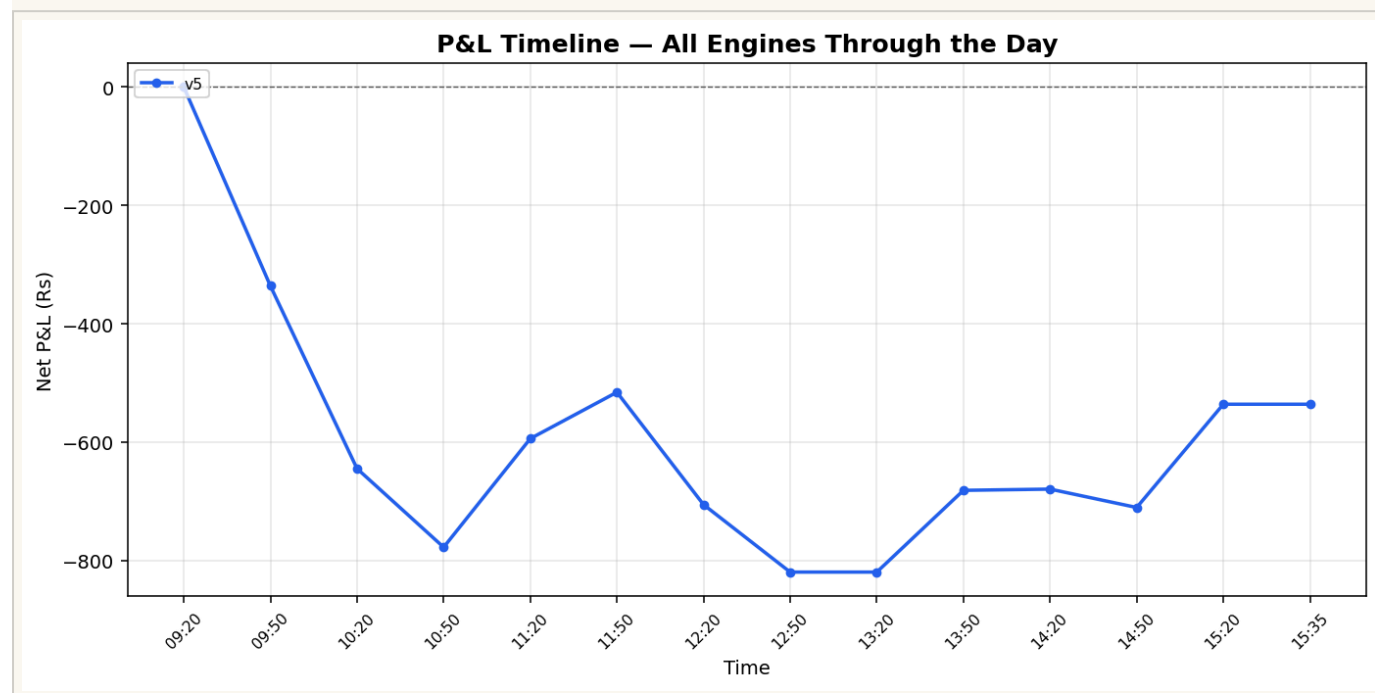

RANK	ENGINE	TRADES	WIN %	AVG WIN	AVG LOSS	NET P&L
★ 1	v5_wide	73	31.5%	Rs +178	Rs -64	Rs +1,060
2	v5	49	44.9%	Rs +55	Rs -65	Rs -536

Nº 03 • TIMELINE

How the day *unfolded*.

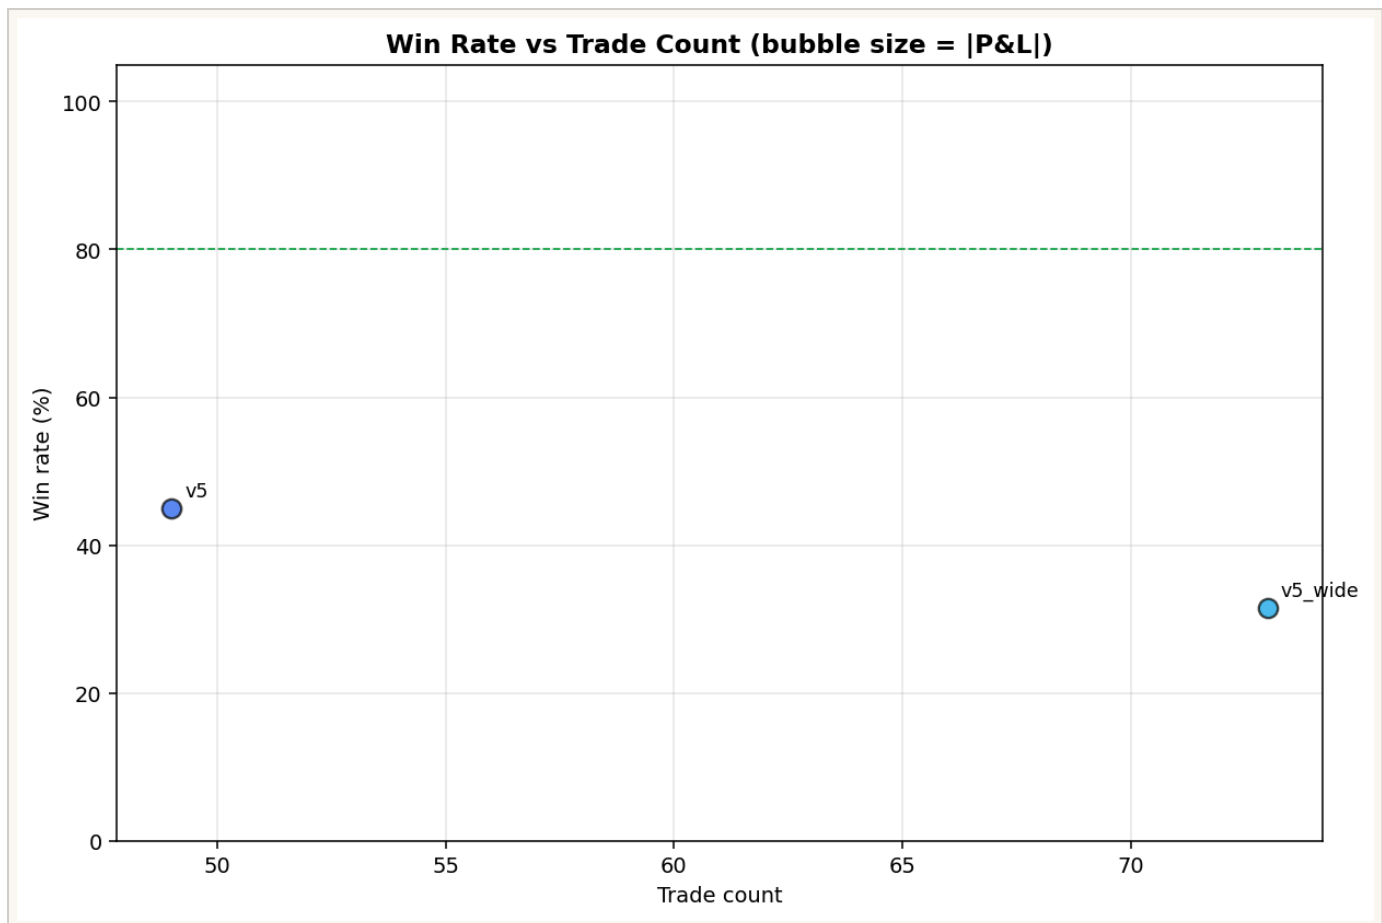

Cumulative profit per engine through the trading session. 30-minute snapshots from the profit-watchdog. Where lines diverge, that's where the engines started disagreeing about the regime.

Nº 04 • EFFICIENCY

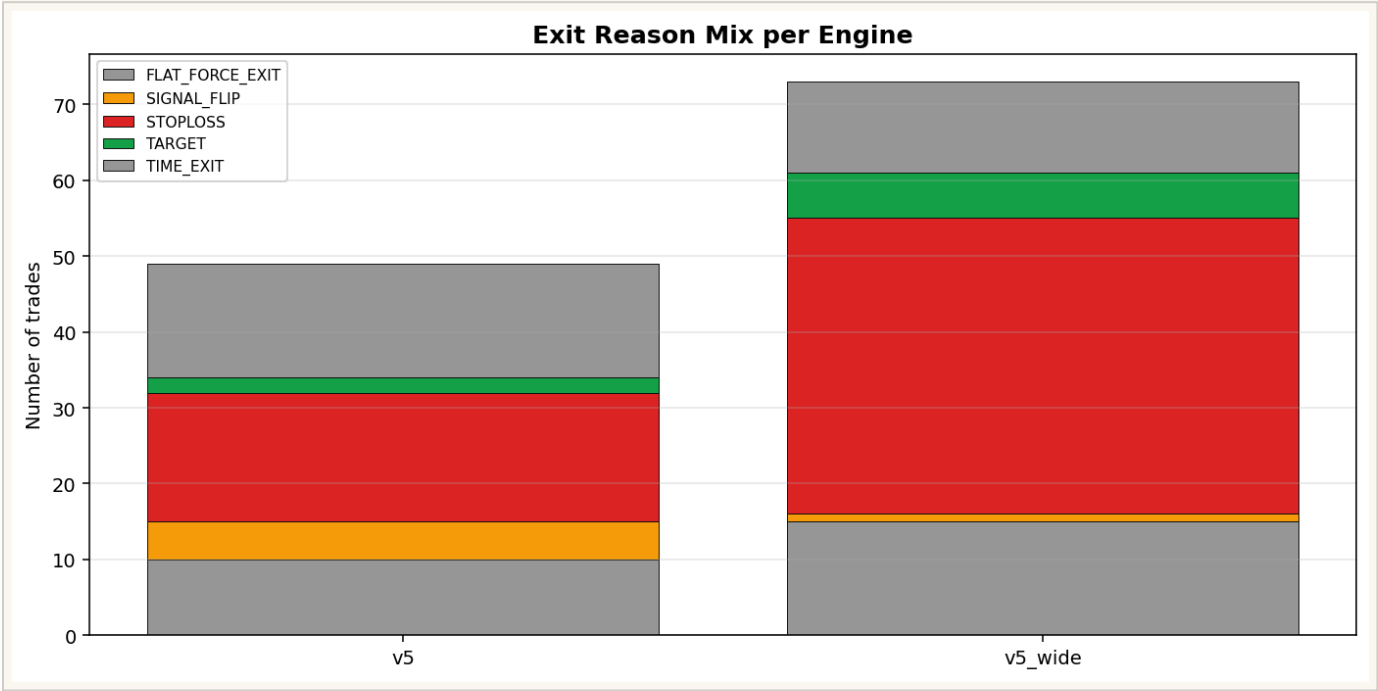

Trade volume *vs.* hit rate.

Bubble size is absolute P&L. Top-right of the plot — high win rate at high volume — is the engine you want to scale. Bottom-left is the one to retire or refactor.

Where the trades *ended*.

A useful diagnostic: an engine dominated by STOPLOSS exits is being stopped out by noise; an engine dominated by SIGNAL_EXIT is reading regime shifts; an engine dominated by TARGET is letting winners run.

Where engines *agreed*.

Symbols touched by two engines today, and the P&L gap between them. High overlap with very different outcomes points at the part of the logic that decides the trade.

PAIR	SHARED SYMBOLS	P&L GAP (A - B)	SAMPLE
v5 vs v5_wide	13	Rs -1,596	ADANIGREEN, ADANIPOWER, CIPLA, COALINDIA, COCHINSHIP, GRASIM...

Patterns the watchdog surfaced.

Auto-extracted observations from the day's data – starting points for the post-market review, not conclusions in themselves. Verify against the per-engine detail in section 08 before acting.

Winner: **v5_wide** with Rs +1,060 across 73 trades (31.5% win).

Laggard: **v5** with Rs -536 across 49 trades (44.9% win).

High-volume engines (50+ trades) averaged Rs 1,060; low-volume averaged Rs -536. **More trades = more profit today.**

v5: STOPLOSS (17) >= TARGET (2). Consider widening SL or tightening entry filters.

v5_wide: STOPLOSS (39) >= TARGET (6). Consider widening SL or tightening entry filters.

v5: 44.9% win rate (target 80%). Entry quality is the problem – tune ML score threshold up.

v5_wide: 31.5% win rate (target 80%). Entry quality is the problem – tune ML score threshold up.
