2. Left on the table – how it was measured

Every closed trade replayed against Kite 5-minute candles after the close: P&L if held to 15:15 (**hold Δ**), which stop-losses reversed afterwards, and how far price travelled our way after exit (**ceiling**). Trades exited at the 15:15 force-close count as zero.

Ops notes

- Kite token refreshed by hand at 08:34; fleet launched once by the 08:50 job (no double spawn this time).
- DAYGAIN lane: Phase 0 holdout backtest FAILED all three gates (net -Rs 3,117/day, t -1.62, DD 18.3%); today's observation run lost Rs 9,020 with 4 early stop-outs – same mechanism. Lane is dead per its spec; engine to be retired.
- missed-ops watchdog still blind (DNS failure inside the process, 0/200 coverage all day) – second session running. Snapshot is stale from 09-04 08:43.
- v5_wide read regime SIDEWAYS while v5 read BEAR on the same tape; v5_wide's 9 TARGET exits made Rs 7,831 of its Rs 8,395 gross.
