EOD Scoreboard — Ranked by Net P&L

Nº 03 • TIMELINE

How the day *unfolded*.

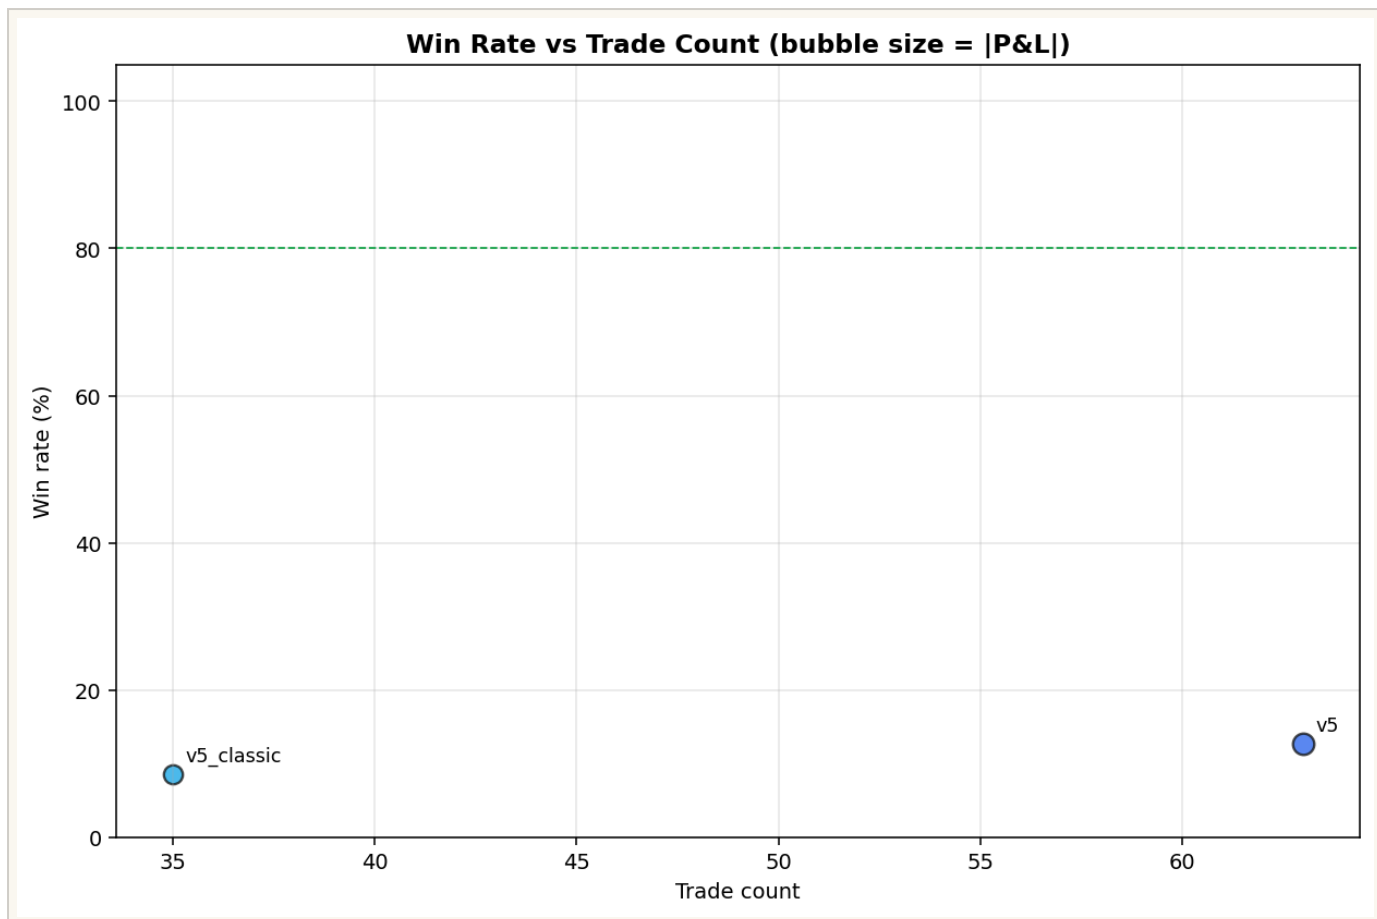

Cumulative profit per engine through the trading session. 30-minute snapshots from the profit-watchdog. Where lines diverge, that's where the engines started disagreeing about the regime.

Nº 04 • EFFICIENCY

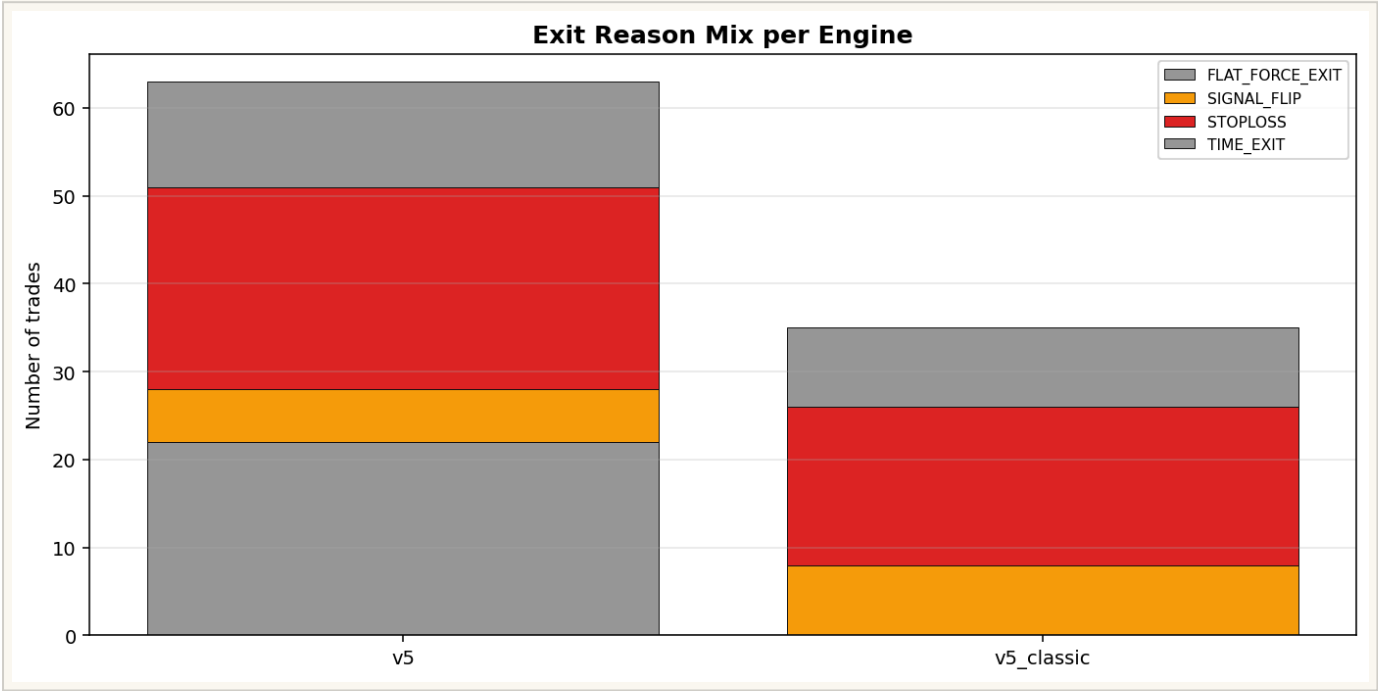

Trade volume *vs.* hit rate.

Bubble size is absolute P&L. Top-right of the plot — high win rate at high volume — is the engine you want to scale. Bottom-left is the one to retire or refactor.

Where the trades ended.

A useful diagnostic: an engine dominated by STOPLOSS exits is being stopped out by noise; an engine dominated by SIGNAL_EXIT is reading regime shifts; an engine dominated by TARGET is letting winners run.

Where engines agreed.

Symbols touched by two engines today, and the P&L gap between them. High overlap with very different outcomes points at the part of the logic that decides the trade.

PAIR	SHARED SYMBOLS	P&L GAP (A - B)	SAMPLE
v5 vs v5_classic	24	Rs -1,045	ADANIENSOL, ADANIPOWER, ATGL, BHEL, BSE, FORTIS...

Patterns the watchdog surfaced.

Auto-extracted observations from the day's data – starting points for the post-market review, not conclusions in themselves. Verify against the per-engine detail in section 08 before acting.

- Winner: **v5_classic** with Rs -1,986 across 35 trades (8.6% win).
- Laggard: **v5** with Rs -3,031 across 63 trades (12.7% win).
- Low-volume engines outperformed – selectivity beat volume today (low-vol avg Rs -1,986 vs high-vol Rs -3,031).
- v5**: STOPLOSS (23) >= TARGET (0). Consider widening SL or tightening entry filters.
- v5_classic**: STOPLOSS (18) >= TARGET (0). Consider widening SL or tightening entry filters.
- v5**: 12.7% win rate (target 80%). Entry quality is the problem – tune ML score threshold up.
- v5_classic**: 8.6% win rate (target 80%). Entry quality is the problem – tune ML score threshold up.
