Nº 02 • SCOREBOARD

Per-engine performance ranked by net P&L. Star marks the day's leader; rows tinted by outcome.

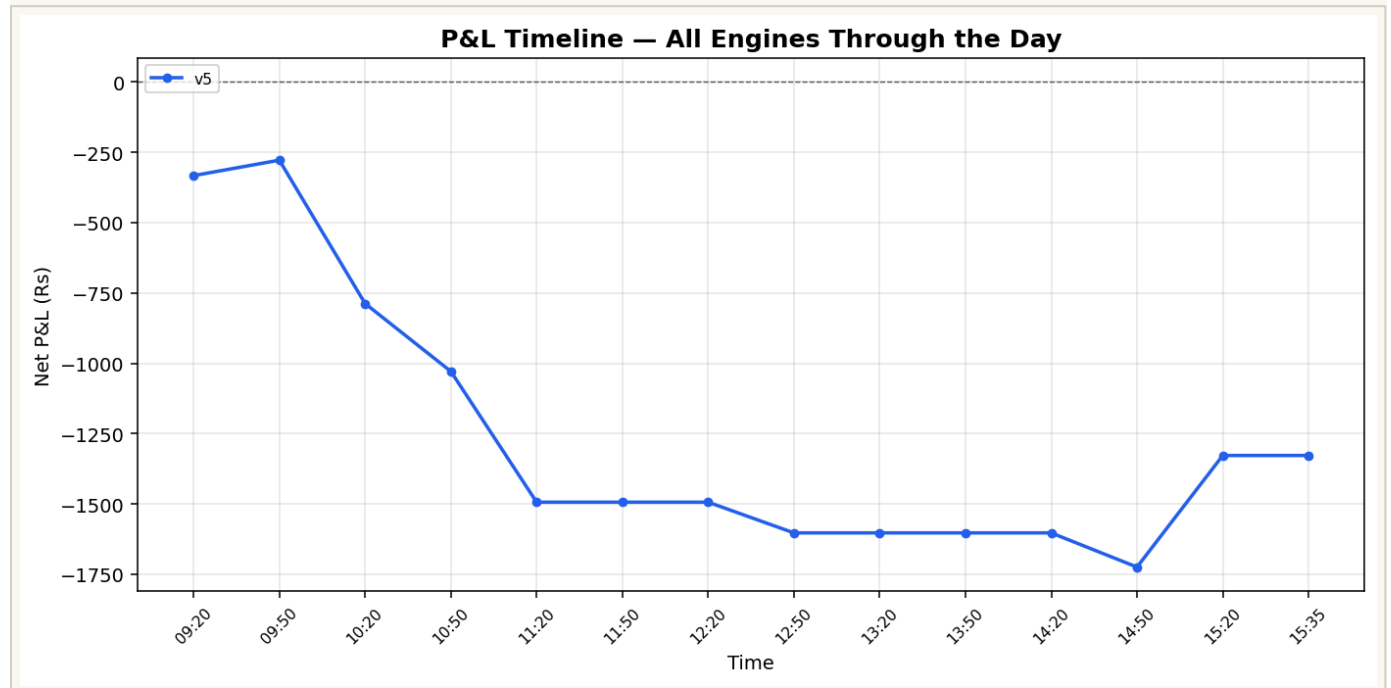

RANK	ENGINE	TRADES	WIN %	AVG WIN	AVG LOSS	NET P&L
★ 1	v5_wide	11	27.3%	Rs +253	Rs -131	Rs -287
2	v5	38	44.7%	Rs +58	Rs -110	Rs -1,328
3	v5_swing	1	0.0%	Rs +0	Rs -2,087	Rs -2,087

Nº 03 • TIMELINE

How the day *unfolded*.

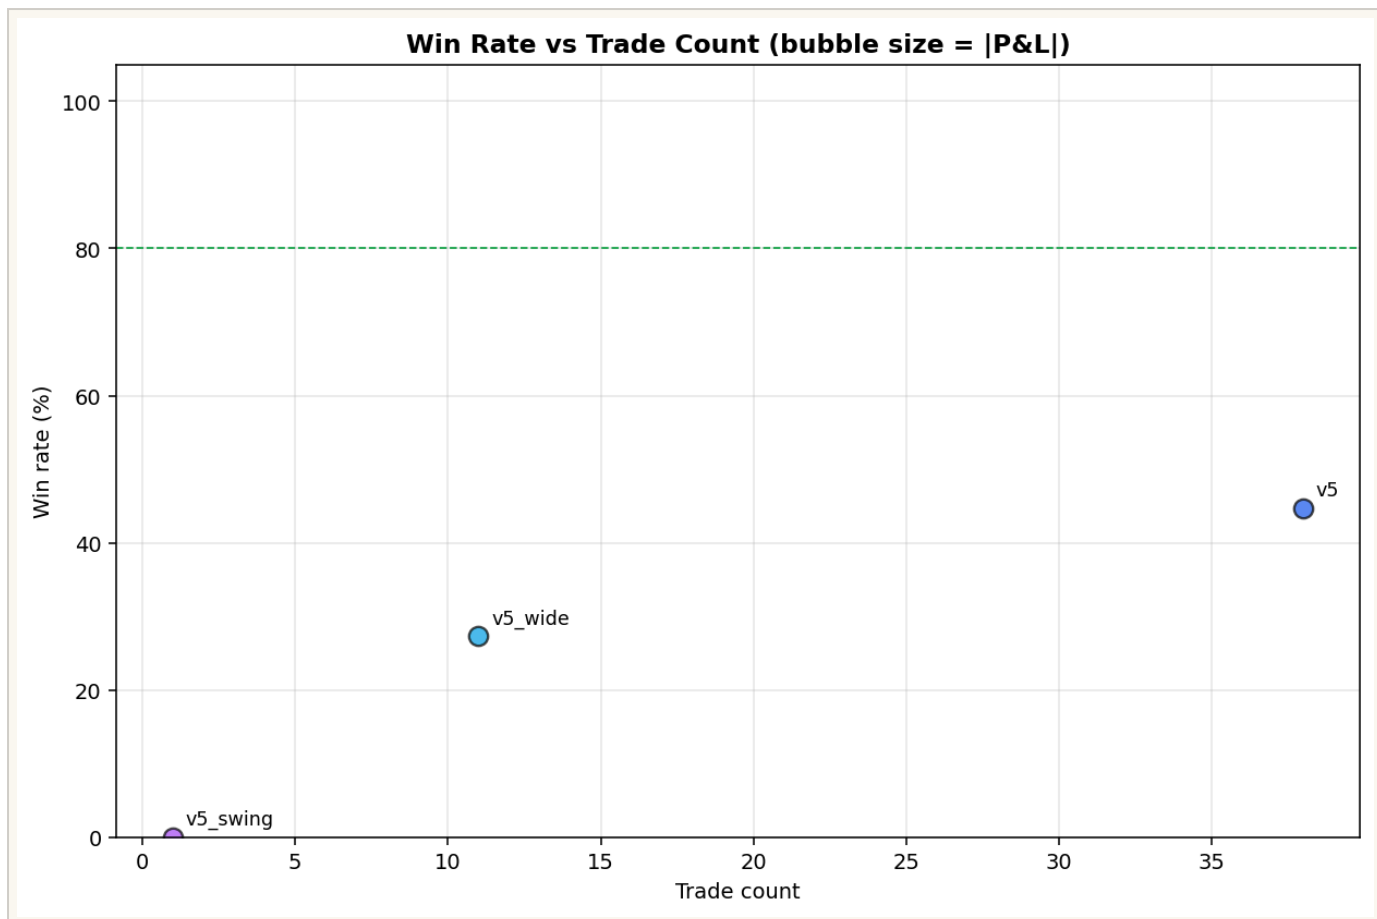

Cumulative profit per engine through the trading session. 30-minute snapshots from the profit-watchdog. Where lines diverge, that's where the engines started disagreeing about the regime.

Nº 04 • EFFICIENCY

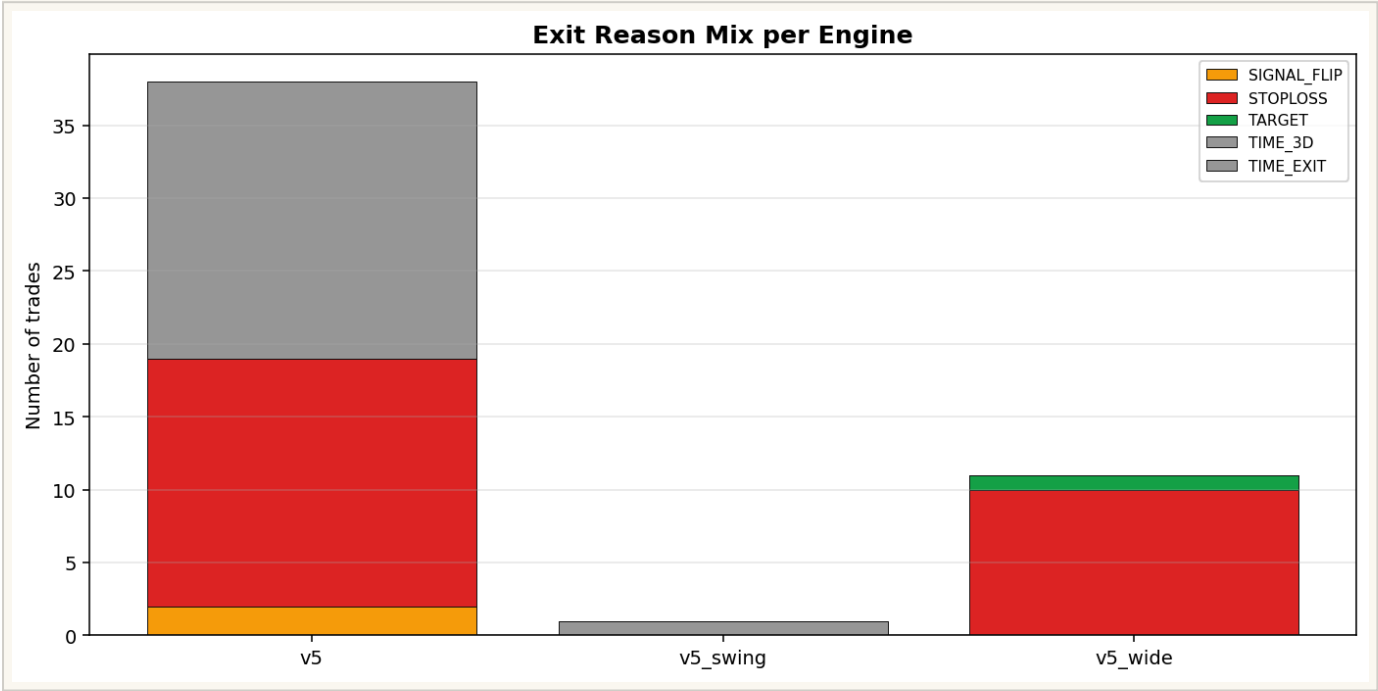

Trade volume *vs.* hit rate.

Bubble size is absolute P&L. Top-right of the plot — high win rate at high volume — is the engine you want to scale. Bottom-left is the one to retire or refactor.

Where the trades ended.

A useful diagnostic: an engine dominated by STOPLOSS exits is being stopped out by noise; an engine dominated by SIGNAL_EXIT is reading regime shifts; an engine dominated by TARGET is letting winners run.

Where engines agreed.

Symbols touched by two engines today, and the P&L gap between them. High overlap with very different outcomes points at the part of the logic that decides the trade.

PAIR	SHARED SYMBOLS	P&L GAP (A - B)	SAMPLE
v5 vs v5_wide	7	Rs -1,041	ADANIENSOL, ATGL, CGPOWER, HAL, MARICO, MAZDOCK...

Patterns the watchdog surfaced.

Auto-extracted observations from the day's data – starting points for the post-market review, not conclusions in themselves. Verify against the per-engine detail in section 08 before acting.

Winner: **v5_wide** with Rs -287 across 11 trades (27.3% win).

Laggard: **v5_swing** with Rs -2,087 across 1 trades (0.0% win).

v5: STOPLOSS (17) >= TARGET (0). Consider widening SL or tightening entry filters.

v5_wide: STOPLOSS (10) >= TARGET (1). Consider widening SL or tightening entry filters.

v5: 44.7% win rate (target 80%). Entry quality is the problem – tune ML score threshold up.

v5_wide: 27.3% win rate (target 80%). Entry quality is the problem – tune ML score threshold up.
