1. Market Context

Indicator	Value
Market Regime	BEAR
Gap Prediction	DOWN -1.87% (GIFT Nifty)
Asia Sentiment	Hang Seng -1.29%, Nikkei -1.05%
FII/DII	FII +672 Cr (buying), DII +410 Cr (buying)
Size Multiplier	0.5x (half position sizing)

Despite the bear regime, **energy, metals, and infrastructure stocks showed strong counter-trend momentum**. A classic sector rotation day.

#	Stock	Change	Sector	Breakout	Signal
18	CUMMINSIND	+1.5%	Capital Goods	12:15	Order book strength
19	ZOMATO	+1.3%	Internet	13:00	Q4 revenue beat estimate
20	ESCORTS	+1.1%	Tractors	13:30	Rural demand proxy

Sector Rotation Themes:

Power/Renewables: SUZLON +5.66%, NHPC +3.91%, CGPOWER +4.41%

Infra Finance: IRFC +4.31%, RECLTD +3.77%, PFC +3.48%

Metals/Mining: HINDZINC +3.26%, SAIL +2.97%, NMDC +2.76%

5. The Profit Problem

Rs 14,303 on Rs 10,00,000 = 1.43% return. That's not enough. Here's why.

Component	Current	Problem
Total Capital	Rs 10,00,000	--
BEAR Regime Sizing	0.5x	Caps deployment at Rs 5L
Actual Deployment	Rs 3,00,000	Only 30% working
Idle Capital	Rs 7,00,000	70% earning ZERO
Return on Deployed	4.8%	Actually decent!
Return on Total	1.43%	This is the headline

The return on **deployed** capital (4.8%) is solid for a bear day. The problem: **70% of capital sat idle.**

6. Solution: Bear Day Alpha Hunter

Mode	Capital	Strategy	Timing
Defensive (current)	20% (Rs 2L)	Current v5 BEAR regime	All day
Alpha Hunter (new)	30% (Rs 3L)	Counter-trend sector rotation	After 10:00 AM

Alpha Hunter Rules

- 1. **10:00 AM scan:** Find stocks UP >1.5% while Nifty DOWN >1%

2. **Sector filter:** 3+ green stocks in same sector = rotation theme
3. **Volume gate:** Only enter if volume >2x average
4. **Position size:** Rs 50K-75K per stock (larger than defensive)
5. **Trailing stop:** 1.5% (tighter than defensive)
6. **Target:** 3-4% (quick sector rotation plays)
7. **Max 6 positions** in Alpha Hunter mode

7. What Our P&L SHOULD Have Been

Scenario	P&L	vs Actual	Improvement
Actual (v5 current)	Rs 14,303	--	--
50% deployment (same stocks)	Rs 23,839	+Rs 9,536	1.7x
+ Top 5 missed stocks	Rs 32,663	+Rs 18,360	2.3x
+ Early entry (09:15)	Rs 34,809	+Rs 20,505	2.4x

Top 5 Missed Stocks -- Potential P&L (Rs 50K each)

Stock	Move	Captured (80%)	P&L
SUZLON	+5.7%	+4.5%	Rs 2,264
CGPOWER	+4.4%	+3.5%	Rs 1,764
IRFC	+4.3%	+3.4%	Rs 1,724
NHPC	+3.9%	+3.1%	Rs 1,564
RECLTD	+3.8%	+3.0%	Rs 1,508
Total			Rs 8,824

Defense (avoiding -30K like v4) is good. But we also need offense (capturing +30K from sector rotation). The solution is a sector-aware momentum scanner that deploys into counter-trend winners even on bear days.

8. Action Items for Tomorrow

Priority	Action	Impact
P0	Implement 10:00 AM sector rotation scan	Catch counter-trend movers
P0	Add Alpha Hunter mode with 30% capital	Deploy idle capital
P1	Earlier entry at 09:15 for ORB plays	Capture first 15-min moves
P1	Sector grouping in stock scanner	Identify rotation themes
P2	Dynamic sizing based on conviction	Larger positions on winners
P2	Short selling on bear days	Profit from both sides

Target for Next Session:

Minimum P&L: Rs 25,000 | Target: Rs 35,000+ | Capital Deployment: 50% minimum
