9. Open Positions (Overnight)

10. Watchdog Alerts

10.1 DRREDDY Pattern Alert

DRREDDY Blacklist Candidate: 3 consecutive stoploss exits on DRREDDY (total -Rs 412, -1.53% to -1.83% per trade). This stock is moving against the momentum signal. Recommendation: Add DRREDDY to a 3-day cooldown list and reduce position size by 50% if traded again this week.

10.2 SUZLON Concentration Risk

Concentration Warning: SUZLON generated Rs 11,453 -- 23% of total daily P&L. While exceptional, high concentration in a single low-price stock (Rs 45-49 range) carries liquidity risk. v5 was deploying 350-480 quantity per trade. If market turns, this can create slippage. Monitor position sizing.

10.3 OIL Timing Mismatch

OIL Trade Alert: OIL LONG entered at 14:53:08 but exited at 10:50:38 (time appears to be from previous session -- data entry mismatch). The -Rs 196 loss is logged correctly but the timestamp order is inverted. Watchdog has flagged this for data validation.

10.4 Positive Alerts

Perfect Execution Detected: 9 stocks (SUZLON, MCX, BLUESTARCO, JSWENERGY, SOLARINDS, WAAREEENER, HDFCLIFE, VOLTAS, NHPC) had 100% win rates with ZERO losses. This is the kind of clean execution that compound returns are built on. The SWING pool momentum detection algorithm performed flawlessly in sideways regime.
